Hub Administration

Nicor Enerchange Hub Administration

Is your company looking for more ways to move, park and borrow natural gas?

If so, your search is over because you can't beat the transportation flexibility that Nicor Enerchange Hub Administration offers.

Operating as the center for gas transportation solutions, Nicor Enerchange Hub Administration, commonly referred to as the "Chicago Hub", offers customers new alternatives in natural gas transportation services.

The Chicago Hub is your link to a vast network of natural gas resources. Between our pipeline connections and storage capabilities, we provide what no other company in the Midwest can offer. We can help your company eliminate pipeline imbalance penalties and enjoy efficient transactions all while continuing to deliver unconditional personal service.

We have direct connections with seven major interstate pipelines:

- ANR Pipeline Company (ANR)
- Natural Gas Pipeline Company of America (NGPL)
- Northern Border Pipe Line (NBPL)
- Northern Natural Gas Company (NNG)
- Midwestern Gas Transmission Company (TGP/Midwestern)
- Alliance Pipeline (APL)
- Panhandle Eastern Pipeline Company

We manage under-utilized storage capacity on behalf of Nicor Gas, maximizing the value of our assets. Our services are provided at regulated rates and are made possible through the use of Nicor Gas' seven underground storage facilities.
